

Synergy

O'NEAL INDUSTRIES FAMILY OF COMPANIES

Family

Family is synonymous with synergy at O'Neal Industries (ONI). As part of the nation's largest family-owned group of metals service centers, each ONI company has the strength, backing, and unwavering support of all the others. Separately, we're leaders in our fields. But combined, our capabilities are exponentially enhanced. And that translates to maximum value for you when you make the ONI companies your one-stop shop for all your metals needs.

Ties

Together we stand to offer customers exceptional breadth and depth of inventory. Together, we offer unprecedented product and processing expertise. Together, we offer access to more than 80 strategically positioned facilities in North America, Europe, and Asia for fast, efficient distribution. Together, we serve customers ranging from job shops to OEMs. Family matters. And nothing matters more to the O'Neal Industries Family of Companies than pooling our resources to bring added value to our customers in each and every way.

ONI

Based primarily on product lines and industries served, the ONI companies are organized into two distinct groups: the Industrial Metals Group (IMG) and the High-Performance Metals Group (HPMG). Companies within a group often work with each other, and sometimes across group lines, whenever there is a specific benefit to the customer such as providing expertise for certain applications or enhancing the speed and efficiency of your supply chain.

Industrial Metals Group

Built On Reliability And Relationships

O'Neal Steel is the United States' largest family-owned, full-line metals distributor and service center, supplying carbon and alloy steel, stainless steel and aluminum products for companies nationwide. O'Neal Steel offers customers a vast array of ferrous and non-ferrous products, technical expertise and value-added services, and is committed to providing customers with consistently fast, accurate and dependable service. Since 1921, O'Neal Steel has conducted business with the highest degree of integrity, fairness, honesty and reliability. onealsteel.com

Complex Fabrications To Your Exact Specifications

O'Neal Manufacturing Services (OMS) is a supplier of fabricated metal components and welded assemblies serving original equipment manufacturers that build equipment and manage projects that shape the world in which we live – from locomotives, to forklifts and bulldozers, to power generation equipment. Founded in 1921, OMS provides highly integrated, comprehensive manufacturing solutions, including steel fabrication, tube processing, plasma cutting, laser cutting, metal forming, welding and machining from multiple strategically located facilities across North America. onealmfgservices.com

The Strongest Name In Steel

Leeco Steel (Leeco) stocks and sells steel plate, maintaining one of the largest inventories of carbon, High Strength Low Alloy (HSLA) and alloy plate steel coming from premier mills worldwide. Founded in 1882, Leeco has 10 strategically located distribution centers in North and Latin America that are stocked with huge quantities of carbon- and heat-treated steel plate in a variety of lengths and thicknesses. Leeco offers exceptional quality, an expansive inventory, expert service and on-time delivery, and carries specialty grades that often are not available from other distributors. leecosteel.com

Experts In Carbon And Non-Ferrous Flat Rolled Metals

O'Neal Flat Rolled Metals (OFR Metals) is a leading processor and distributor of non-ferrous and carbon flat rolled metal products. Its eight locations house over 650,000 square feet of processing and warehousing capabilities, offering customers sheet and coil materials including stainless, aluminum, hot rolled, cold rolled and galvanized. OFR Metals also offers painted, polished and coated material to suit diverse customer needs, and its in-house processing solutions include leveling, slitting, blanking, shearing and polishing. ofrmetals.com

High-Performance Metals Group

The Name Says It All

Stainless Tubular Products (STP) is a specialty stainless steel tubing and pipe supplier, providing nickel alloy, tubing, pipe, fittings and hollow bar products to customers nationwide. Offering one of the nation's largest and most diverse inventories of ornamental and mechanical tubing, STP provides in-house production and polishing departments that custom cut and finish stainless steel pipe and tubing to any specification. Founded in 1979, STP takes pride in its employees, products and service, resulting in its continued growth. stainlessstubular.com

Serving Industries From Aircraft To Nuclear

TW Metals (TW) is a full-line specialty metals distributor serving customers in aerospace, nuclear, fabrication, transportation, and many other industries. Headquartered in Exton, Pennsylvania, TW offers customers tube, pipe, bar, sheet, plate and extrusions in stainless, aluminum, nickel, titanium and other high-value alloys. In addition to distributing specialty metals, TW partners with its customers to provide innovative supply chain solutions, streamlining and customizing programs to suit specific production needs. TW has 30 stocking locations in North America, Europe, and Asia providing outstanding service to satisfied customers worldwide. twmetals.com

Specializing In Specialty Grades

United Performance Metals (UPM) is a global distributor of high-performance metals serving customers in a variety of industries, including aerospace, fastener, medical, power generation, oil and gas, semiconductor and many others. UPM offers a comprehensive inventory of products, including stainless steel, duplex stainless steel, Prodec®, nickel alloys, cobalt alloys, cobalt chrome moly, titanium, aluminum, and alloy steel. FIRSTCUT+® Processing Services include cut-to-length, leveling, slitting, edging, chamfering & facing, shearing, laser cutting, laser gauge measurement, water jet cutting, plasma cutting, sawing, precision cold saw cutting, precision blanks, first stage machining, heat treating, ultra-sonic testing, boring, trepanning and deburring. For more information, visit www.upmet.com.

O'Neal Industries (ONI), the largest family-owned group of metals service centers in the United States, is the parent company of Leeco Steel, O'Neal Flat Rolled Metals, O'Neal Manufacturing Services, O'Neal Steel, Stainless Tubular Products and United Performance Metals. Based in Birmingham, Alabama, ONI has more than 80 specialized facilities throughout North America, Europe and Asia. onealind.com
