Monthly Market Intelligence for Customers of United Performance Metals

# AK Steel Announces Stainless Steel Price Increase

WEST CHESTER, OH MARCH 14—AK Steel reported that the company will increase prices for all of its stainless steel products, effective with shipments on April 1, 2014.

AK Steel said the increase will be achieved through a discount reduction of two percentage points. For all products priced using net prices, including automotive exhaust products, the increase will be achieved by adding \$.02 per pound to the existing prices.

Surcharges for the broad range of stainless steel products that AK Steel produces will remain in effect, and can be found under the Markets and Products section of the company's web site at <u>www.aksteel.com</u>.

## North American Stainless Announces Price Increase

GHENT, KY MARCH 13—Effective with shipments April 1, 2014; North American Stainless will increase prices for all Cold Roll grades in 200, 300, and 430 series. This will be achieved by reducing the discount by 2% points.

In addition, Automotive grade prices will increase by \$40.00/ton. According to the company, the increases are necessary to support further investment in the business. All applicable surcharges will remain in effect, as outlined on the company website <u>www.northamericanstainless.com</u>.

# **Outokumpu Stainless Americas Implements a Price Increase**

MARCH 14—Effective with all shipments, April 1, 2014, Outokumpu Stainless Americas will implement the following price increase: All 200, 300, and 430 cold rolled stainless products discounts will be reduced 2 discount points. Please contact your Outokumpu Stainless Americas sales representative with any questions. <u>www.outokumpu.com.</u>

# **US Raw Steel Production Slides 0.7 percent**

AMM NEW YORK MARCH 19—U.S. raw steel output totaled an estimated 1,828,000 net tons last week, down 0.7 percent from 1,840,000 tons the previous week, as mills operated at an average capacity utilization rate of 76 percent.

In the corresponding week last year, mills produced 1,827,000 tons at an average capacity utilization rate of 76.2 percent, according to the American Iron and Steel Institute, Washington.

# **Stainless Scrap Driven Higher by LME Nickel**

AMM, NEW YORK MARCH 18—Stainless steel scrap prices continued to rise across the austenitic grades this week thanks to steady demand and London Metal Exchange nickel prices that surpassed \$16,000 per tonne, market sources said.

*AMM*'s broker/processor buying prices for Type 316 solids rose to \$2,105 to \$2,150 per gross ton from \$2,060 to \$2,105 per ton last week, 304 solids jumped to \$1,635 to \$1,680 per ton from \$1,590 to \$1,635 per ton and 304 turnings rose to \$1,455 to \$1,480 per ton from \$1,410 to \$1,455 per ton previously.

A revitalized LME nickel contract has maintained its momentum this week, with three-month metal closing the official session March 18 at \$16,125 per tonne (\$7.31 per pound), up 2.9 percent from \$15,675 per tonne (\$7.11 per pound) March 11 and breaking \$16,000 per tonne for the first time since April 12, 2013.

### March Madness Customer Contest

The NCAA Men's Basketball tournament is underway. By the time you read this publication, we will be close to announcing the winners of a GoPro Hero 3 camera!

# "What Is It?" Video Customer Contest

Our last round of **What Is It?** videos were so popular, that we have developed a new set of stumpers ready to test your stainless know-how! Be sure to tune into www.upmet.com. The videos will hit the airwaves mid-April.

# What Does Manufacturing Mean to You?

The National Association of Manufacturers unveiled a new video that demonstrates the manufacturing industry's resurgence and the promise it holds for all Americans through a simple question, "What does manufacturing mean to you?"

For some, manufacturing means innovation, job creation and opportunity. According to a recent economic forecast, "manufacturing will grow faster than the overall U.S. economy" and is expected "to add 356,000 jobs in 2014, or an average of nearly 30,000 a month."

To view the two-minute video, go to http:// bit.ly/1gGrjbB

#### Featured Customer - The Surly Anvil

Think the only time you'll see someone wearing medieval armour is at a renaissance festival? We know one UPM customer who may change your mind.

John Gruber creates custom armour forged from steel in his shop, The Surly Anvil, Key Largo, FL. John first began this line of work after experiencing an injury during a medieval style jousting tournament. He realized how critical it was to wear the proper equipment and decided to make it himself. What began as a weekend obsession has grown into a full time passion. Two years later, John has a steady following of fellow jousting enthusiasts eager to don their own armour, made by hand in his shop.

"My armour is built to fit the body as the body is; flowing and without straight or flat surfaces. I am proud to say that my armour is heated with a coal forge and shaped with hammers, stakes, and anvil."

Some of John's customers put their armour to the ultimate test in The Battle of Nations, an international historical medieval battles world championship. The Fifth Jubilee will be held in Croatia June 12-14. This is a full contact competition; no stage reenactment battles. Participants of the festival are ordinary people, teachers, managers, doctors, drivers, etc. who have a passion for the clashing of swords and the desire to win.

Whatever the use for his armour, John believes in crafting quality products that provide safety to the wearer in any arena. Visit Facebook to learn more about The Surly Anvil.

# Service Spotlight - Laser Cutting

United Performance Metals' laser cutting capabilities allow us to save you time and money.

- Streamline your manufacturing process by receiving product that is ready to weld, form or bend.
- Reduce scrap by only paying for the metal you use.
- Increase profits by reducing the administrative burden of managing multiple sources - let us be your single source for material and cutting requirements.

Our in-house, state-of-the-art inspection and reverse engineering equipment ensures cut parts are delivered to your exact specifications. Have a part but not a drawing? Our reverse engineering capabilities can help.

For those customers requiring finishing options, UPM offers a Timesaver<sup>®</sup> highproduction deburring machine. The end result is a high quality finished part that can move quickly into the next stage of production.
